

Earthquakes

HAVE FUN!

By Cecilia Minden

DISCUSS

Talk through your thoughts.

- What would you do if there was an earthquake? Talk with someone about what to do during severe weather or disaster.
- Why do earthquakes happen? Tell someone facts about the Earth and use any new words you learned!

CREATE

Make an experience of your own.

- Build houses and buildings out of blocks or toys. Pretend there is an earthquake. What happens?
- Create a poster showing what to do during an earthquake.

IMAGINE

Use your imagination to explore.

- Find out more about scientists who study earthquakes.
- People may need help after an earthquake. Imagine what they would need and make a list of ways that you could help others.
